

WESTMINSTER CITY LIBRARY. Architects: Messrs. Esher & Blythe, F.R.I.B.A.  
Electrical installation: Messrs. Drake & Goshaw Ltd. Lighting equipment for library and office  
designed and manufactured by Thorn Electrical Industries Ltd.

**C**LOSE COLLABORATION between architect, lighting engineer and electrical contractor has created lighting for the new Westminster City Library, Charing Cross Road, which is not only efficient but is integral with the interior design. In the book library (above) and gramophone record library, ATLAS twin-tube 80-watt enclosed fittings give ample, almost shadow-free light

## INTEGRAL LIGHTING

even for the lowest shelf. The fittings themselves are of pleasing design, with 'Perspex' covers and are specially made to give easy maintenance. General lighting for the Book Exchange entrance hall is from ATLAS 30-watt cornice tubes, and direct lighting for the counter comes from ATLAS twin 40-watt fittings concealed behind reeded glass panels in the soffit.

**LIGHTING ADVISORY SERVICE**—Our staff of Lighting Engineers will gladly co-operate in design of any installations. Write for details of the full ATLAS range.

*The Atlas Quickstart Unit provides immediate starting and reliable operation of the fluorescent tube even during periods of voltage variation, without reduction of tube life.*
